

GM400D high speed grout mixer/agitator

Description

GM400D grout mixer is a high speed&high-efficiency grout mixer. It could be used as a high speed mixer and agitator. The unit will rapidly and efficiently mix various types of grout which can include cement, bentonite and sand. It is specially designed for cement mixing and grouting in ground/underground engineering. We also can design the mixer with agitator separately, to make the mixing work continuously.

Feature:

1. High speed mixing
2. High-efficiency(3min.)
3. Simple structure, lightweight, easy maintenance.
4. No wearing parts.
5. Diesel engine drive.

Technical data:

| Item | Technical data |
|-----------------------|------------------|
| Tank Capacity | 400L |
| W/C Ratio: | ≥ 0.45 |
| Mixing time | 3min |
| Outlet pressure | 1bar |
| Impeller speed | 1500rpm |
| Diesel Power | 10Hp |
| Diesel rotating speed | 2200rpm |
| Dimension | 1650*1600*1200mm |
| Weight | 300kg |
