

GMA2X300/1000 Container type grout mixing machine

◆ Product Description

GMA2X300/1000 Container type grout mixing machine integrated 2 mixers and 1 agitator in one container. It is mainly used for making cement slurry, etc., which is applied to surface/underground construction, such as highway, railway, hydropower, construction, mining, etc.

High-speed eddy current mixer ensures fast and even mixing, water and cement are quickly mixed into a uniform slurry. The entire machine is installed in a container, the structure is compact, and the transportation is very convenient. Under the harsh work conditions in the wild, the container can protect the machine and bring a better experience.

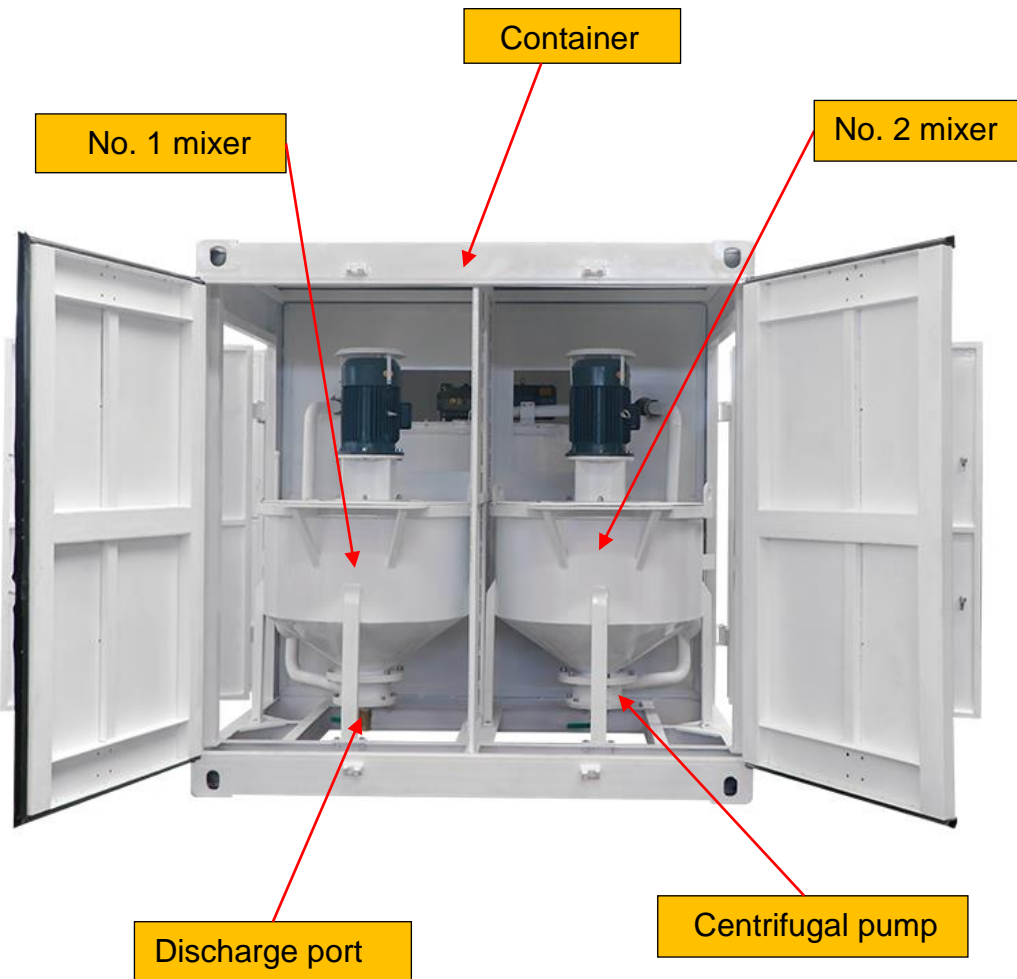

◆ Product Feature

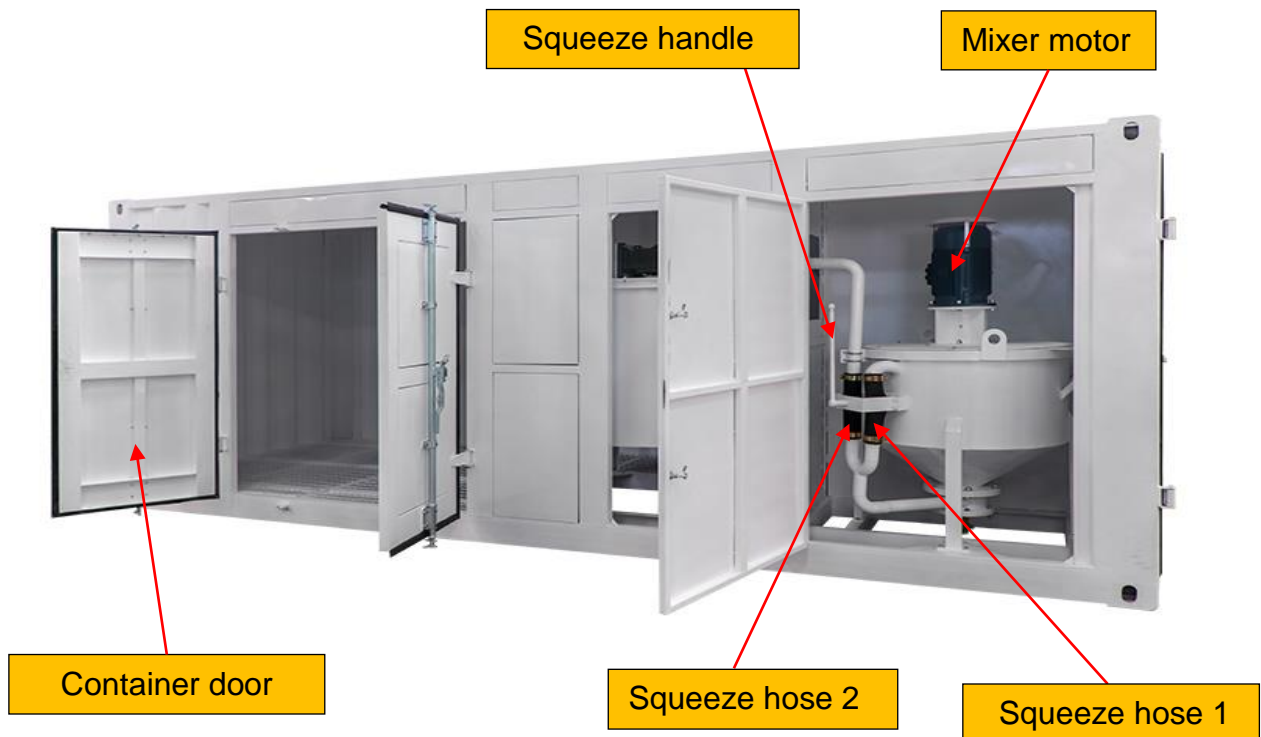

1. Compact structure.
