

## GDH70&GH90 High-Pressure Grouting Pump

GEC Hydraulic drive grouting pump are a universal high-pressure grouting pump and is used for grouting in soil, earth foundation stabilization, waterproofing, tunnel lining, underwater foundations, bridge decks, deep well casing, slope line grouting, etc.

### Feature:

- Single piston with double-acting.
- Hydraulic drive
- Compact structure
- Ball valve

### Specification :

Item	GDH70	GDH90
Rated Output	0-70 L/Min	0-100 L/Min
Rated Pressure	10MPa(1450PSI)	10MPa(1450PSI)
Cylinder Dia.	110mm	110mm
Stroke/Minute	31	45
Inlet Dia.	38mm	38mm
Outlet Dia.	32mm	32mm
Power Unit	7.5kW	11kW
Transmission	Hydraulic drive	Hydraulic drive
Chassis	Skid	Skid
Weight	450Kg	580Kg
Overall Dimension	1505x770x1110mm	1505x770x1110mm
Note: Single or Double Passageway are optional; Chassis: Skid or Tyre		

# Gaode grout pump
