

GAODETEC

Industrial Hose Pump

GAODE EQUIPMENT CO., LTD.

GH Series Industrial Hose Pump

Gaode Equipment Co., Ltd, short name Gaodetec, is a manufacturer specialized in R&D, manufacture and sale of industrial hose pump.

We have now developed full series of products with tens of models, working pressure from 0.6-3 Mpa, output from 0.01-50 m³/h, NR, NBR and EPDM squeeze hoses are available options for customization.

From years of experience Gaode Equipment Co., Ltd. has developed its own R&D and technician teams, which supports further development and customized service for clients.

We control quality of industrial hose pump throughout the whole process strictly, and certified by ISO9001:2008, CE and SGS.

Since 1998, we have become main supplier of pump head for one of world's famous hose pump manufacturer. From recent years, we are also providing matched hose pumps for TBM machine manufacturer in China. Our hose pumps are widely applied in architecture, underground construction, petrochemical industry, metallurgy, food industry, ceramic, mining, water treatment, pharmacy, and papermaking.

Fields of Application

Construction

Conveying and spraying of mortar and concrete

Pharmacy

Conveying of corrosive and poisonous materials

Textile Mill

Conveying of fiber contained fluid, dye and waste water

Dye Making

Conveying of coating, paint and color

Water Treatment

Conveying of water and waste water

Papermaking

Conveying of pulp, color and glues

Mining

Conveying of mineral waste residue

Ceramic

Conveying of glaze slip and color

Brewery and Beverage

Conveying of beer, wine, milk, juice, additive and residue

Underground Engineering

Conveying of mud fluid in TBM

Advantages

- No seals
- No valves
- Self -priming
- Only tube to replace
- Dry –running without damage
- Reversible
- No contact between product and mechanical parts
- Able to pump products with solid parts inside
- Easy maintenance, low-cost, short down time

Perfect Pump for

- Corrosive
- Abrasives
- Shear sensitive fluids
- High viscosity fluids
- High density fluids
- Large solids
- Metering ($\pm 1\%$)
- High Pressure (3 MPa)

Working Principle

GH series industrial hose pump (squeeze pump) consists mainly of pump house, rotor, roller, idle roller, squeeze tube and driving unit. The squeeze hose is U-shape in pump house, when rotor drives roller to rotate, hose is deformed. After the roller rotate, the deformed hose recover by its elasticity. Thus the negative pressure in this hose is generated, sucking slurries, and discharging through outlet under roller's push, finally forms pressure conveying of slurries.

GH series industrial hose pump are mainly applied in distant conveying, grouting and dosing of viscous slurries in construction, mining, food, papermaking, ceramic, etc.

Gaodetec Tube

Gaodetec Tube

High quality precision made hose pump tube, using the very highest quality compounded rubber materials on the market, re-enforce with multi-layers of braided nylon & a manufacturing process that ensures precise and constant dimensional tolerances at every point to the entire length of the hose.

This high level of attention provides a finished hose product that delivers very high life & outstanding performance.

Production Process

The hose fabrication process consists of wrapping the hose in a protective cover and then curing as part of the final bonding process. Upon cooling, the hose is precision machine ground. This last step separates our hose from the many others that are available in the market.

If the hose is not precision ground, this can lead to a number of disadvantages:

BENEFITS OF PRECISION GROUND HOSE

Minimizes friction between the shoe or roller and the hose, thereby:

- Hose exceeds specified dimensions – this could overstress the pump, gearbox and motor bearings.

- Hose is below specified dimensions – the pump could suffer from a damaging backflow of product, leading to a reduction in flow rate, hose erosion and a reduction in hose life.

- Gives good force to roller
- Prolongs lifespan of hose
- Brilliant suction of 5 m
- High pressure of 3 MPa
- High accuracy ($\pm 1\%$)
- Interference-free conveying system
- Suitable for slurries of high viscosity

Replacement hose can be supplied for other pump brands

We supply replacement hoses suitable for:

- Watson-Marlow
- Bredel,
- Verderflex,
- Boyser,
- Albin,
- Ragazzini,
- Delasco,
- Envirotech
- And many more.

Material and bore size options

EPS manufacture in various materials, including Natural, Nitrile, Food Grade White Nitrile (Meets FDA and 3A compliances), EPDM & CPSE (CSM) rubber.

We can supply hoses in various different internal sizes from 5mm bore to 200mm bore.

NATURAL RUBBER (NR)

Outstanding abrasion resistance. Generally resistant to diluted acids and alcohols.

- Max. fluid temperature 90°C (176°F)
- Min. fluid temperature Minus 15°C (Minus 4°F)

NITRILE RUBBER (NBR)

Resistant to oils, greases, alkalis and detergents.

- Max. fluid temperature 80°C (176°F)
- Min. fluid temperature Minus 10°C (Minus 14°F)

EPDM

Outstanding abrasion resistance. Generally resistant to diluted acids and alcohols.

- Max. fluid temperature 90°C (176°F)
- Min. fluid temperature Minus 15°C (Minus 4°F)

GAODETEC HIGH PRESSURE TUBE

Outstanding abrasion resistance and high working pressure with steel wire reinforcement layer

- Max. fluid temperature 90°C (176°F)
- Min. fluid temperature Minus 15°C (Minus 4°F)

Accessories and Optionals

Coupling & clean ball

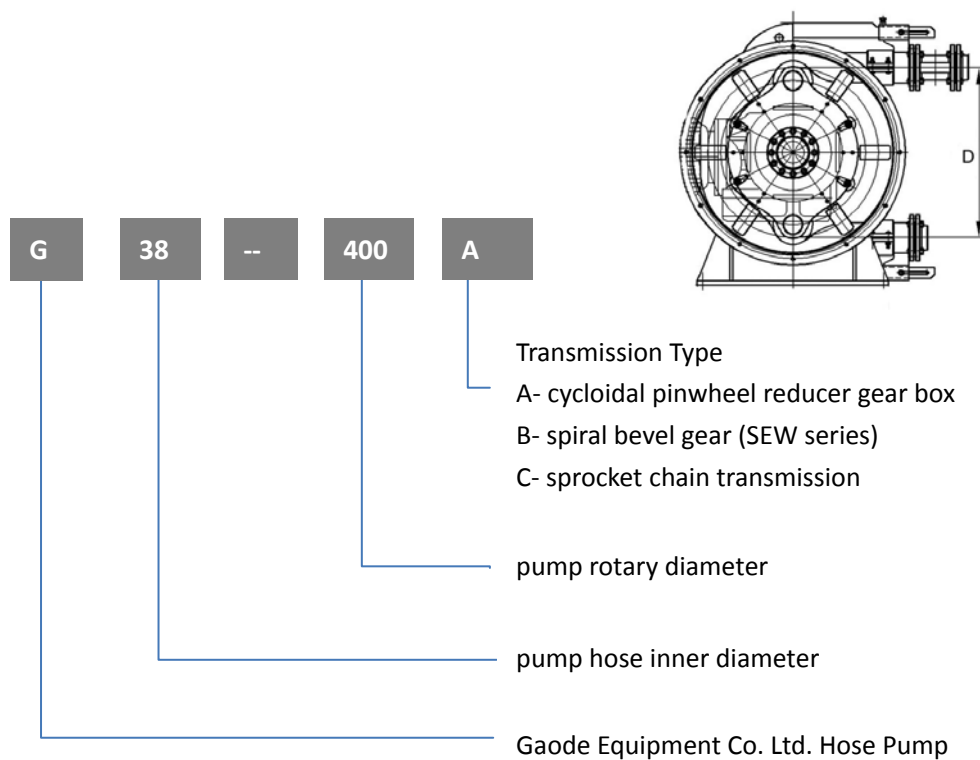

Variable gear speed

Ratio 1: 5

Frequency inverter

Model Definition

A- cycloidal pinwheel reducer gear box

B- spiral bevel gear (SEW series)

C- sprocket chain transmission

Tables of GH series industrial hose pump

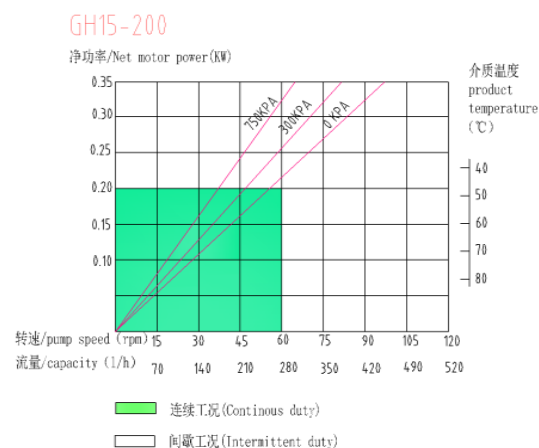

GH10-190

Capacity: 0.022 L/rev
Max discharge pressure: 6 bar
Hose inner diameter: 10 mm

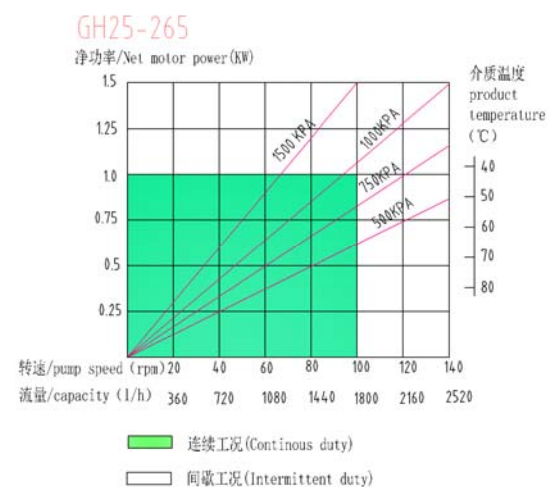

GH15-200

Capacity: 0.077 L/rev
Max discharge pressure: 6 bar
Hose inner diameter: 19 mm

GH25-265

Capacity: 0.3 L/rev
Max discharge pressure: 15 bar
Hose inner diameter: 25 mm

GH32-330

Capacity: 0.625 L/rev
Max discharge pressure: 15 bar
Hose inner diameter: 32 mm

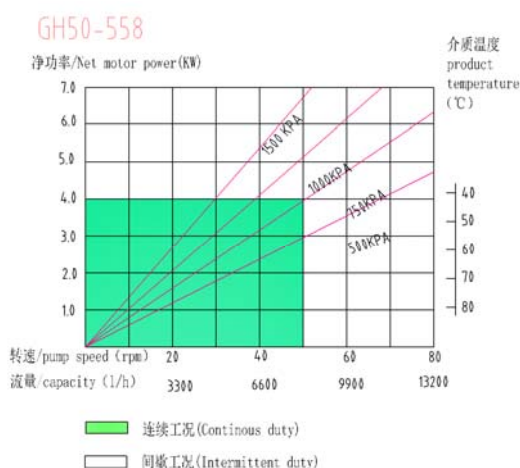

GH38-430

Capacity: 1.25 L/rev
Max discharge pressure: 15 bar
Hose inner diameter: 38 mm

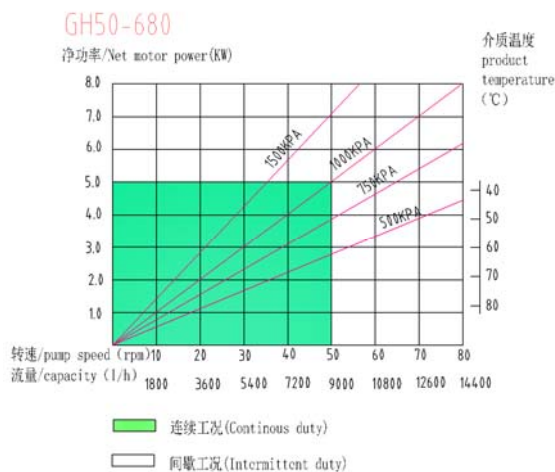

GH50-558

Capacity: 2.75 L/rev
Max discharge pressure: 15 bar
Hose inner diameter: 50 mm

GH50-680

Capacity: 3.0 L/rev
Max discharge pressure: 15 bar
Hose inner diameter: 50 mm

GH65-680

Capacity: 5.0 L/rev
Max discharge pressure: 12 bar
Hose inner diameter: 65 mm

GH76-770

Capacity: 7.5 L/rev
Max discharge pressure: 10 bar
Hose inner diameter: 76 mm

GH76-915

Capacity: 9.16 L/rev
Max discharge pressure: 10 bar
Hose inner diameter: 76 mm

GH100-915

Capacity: 17.5 L/rev
Max discharge pressure: 7.5 bar
Hose inner diameter: 100 mm

Note

1. Intermittent duty: Max. 2 hours working and stop for 1 hour
2. Flow rate takes water as medium
3. You may inquiry to us if the model you need is not listed

Dimension of Structure

	A	B	D	E	F	G	H	L	h	2-d	4-Φ
GH10	300	160	190	200	50	180	245	420	135	10	12
