

GD-N1 Wall Putty Spray Machine

GD-N1 plastering machine is a small-size, dry-mixed mortar transfer pump, which is suitable for materials less than 2mm, such as mortar that can be pumped, putty, paint, coating materials and things alike. GD-N1 can be your spraying machine if it is equipped with our small-size air compressor, spray gun or relative accessories.

GD-N1 is composed of many independent components. The volume and handy design facilitate the transportation of the machine.
