

DOUBLE PISTON MORTAR PUMP

Ideal for pumping, conveying, injecting and spraying common, premixed and special mortars.

GMP70/30, the double piston pump can handle aggregates with a particle size up to a maximum of 5 mm, ensuring high efficiency, low maintenance costs and low energy consumption. Thanks to pump unique design inspiration is equipped with 2 pistons. Machine guarantees uniform and continuous spray pattern.

Technical parameter:

Model: GMP70/30

Electric motor: 4kw

Theoretical output: 70L/min

Max. aggregate size: 5mm

Max. working pressure: 30bar

Compressor: 200L/min

Hopper capacity: 0.28m³

Delivery distance: 90m

Delivery height: 28m

Dimensions: 200x86x88cm

Weight: 360kgs

Double Pistons

Safe & Independent Electronic Control

Long & Short Nozzle

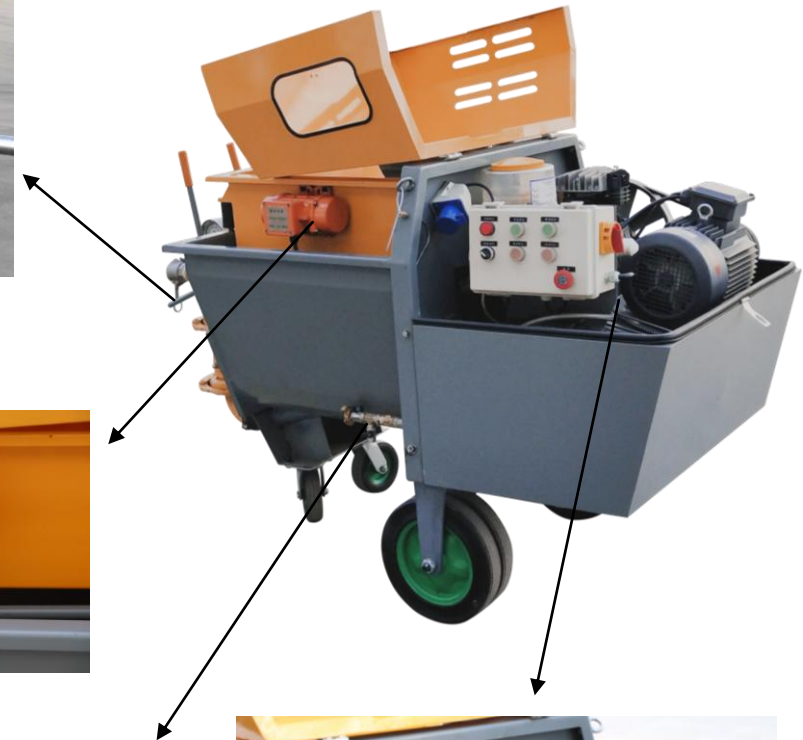

Accessories tools

It can spray more than 1500m² per day with an average thickness of 2cm with double piston.

Unique Advantages:

1. Double cylinder & double-acting, ball valve, quick clamp connection, operation and cleaning conveniently. Paddles in hopper with **Reciprocating movement**, prevent **hopper materials deposition**.
2. The screen adopts **rubber spring** with cone bolt installation, convenient disassembly;
3. Equipped with double special mortar nozzles, making spraying operation more **smoothly, continuously** and reducing the rebound effectively.
4. Machine light, 1-2 person can easily move the machine.
5. Independent electric control box and remote control system, machine operation is safer. **Waterproof vibrator**.
6. Quick installation and **rubber piston long work life** and **low maintenance cost**.
